LEXMARK™

Super compact thermal inkjet Coder (TIJ)

Markoprint X1JET LX is based on reliable Markoprint X4JET technology. This compact and powerful system is available in different, upgradable system versions. Markoprint X1JET LX is designed for different range of applications i.E. food & beverage, chemical, coated/uncoated materials, timber and the pharmaceutical industry.

The small & compact integrated controller/printer comes in a single unit. The innovative system codes smooth absorbent and semi-absorbent surfaces - quickly, accurately and reliably.

- Innovative technology for printing information directly onto cartons
- High availability through cartridge technology, tested and proven a million of times
- High quality, high resolution printing based on twin nozzle row
- Automatic ink type recognition and filling level control
- Highly resistant to static discharge
- Up to 10 mm distance from product

Easy to use

No training necessary: printing with the Markoprint X1JET LX is simple, due to 3-logic intuitive operation with LED status light. Data transmission is initialized with USB stick/interface.

- User friendly due to 3-logic
- Select and print directly 9 layouts/labels

Universal and flexible use

Markoprint X1JET LX uses True Type fonts for printing. All conventional 1- and 2-dimensional codes* can be printed. The controller is fully integrated into the print module.

- Highly compact design (see also picture in original size)
- Simple integration into packaging systems and conveyors for printing from the side or top
- No separate photo sensor required for triggering/initializing the printing process – Built in photo sensoralready in the system unit (external signal input optional)
- Printing height up to 12.5 mm

Control

Different performing system versions are available, with different functional features, depending on application requirements: Print, Basic, Advanced and Pro.

The system X1JET LX allows data transmission via USB stick. Each controller has a network connection (LAN) or a standard EIA-232 interface. Print layouts are created with iDesign software.
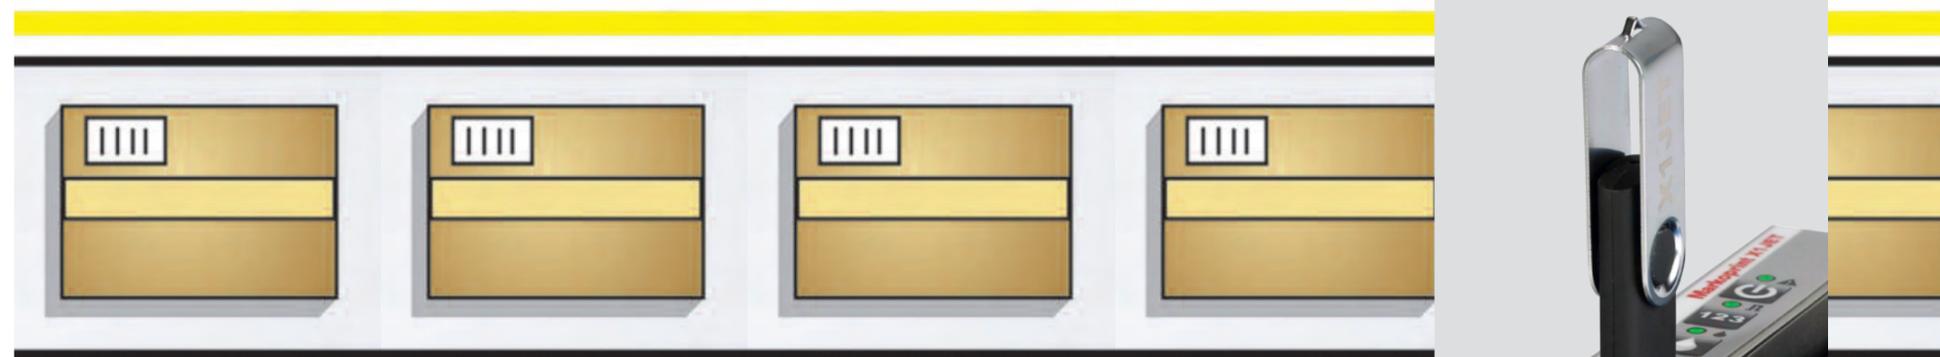

- Data transfer using USB stick
- Data transfer connecting Ethernet and EIA-232
- Data transfer connecting to Options interface (printing communication from PLC or external photosensor)
- Data transfer enabling Web interface

Wide range of standard accessories

- Rotary/Shaft encoders, for different dynamicly adapting conveyor speeds
- Flexible bracket for varying product
- Mounting brackets for use horizontally and vertically

Wide ink range

A wide range of water-based inks to satisfy many applications. Absorbent surfaces are marked permanently, with excellent resolution. A diversity made possible only through the use of fast interchangeable cartridge systems.

Markoprint X1JET LX
Compact, independently operating printhead for simple integration into existing production lines.

3-Logic User Interface
LED indicators for intuitive use

LX cartridge
Perfect print quality through Dual-Channel nozzle technology
